## FACT SHEET

### Vuzix – Management Team

Vuzix' management team has a significant track record in areas essential for the company's success. This includes technology development, marketing and sales, software, business development, strategic partnerships, finance, IPOs, rapid-growth and startup operations.

**President: Paul J. Travers**

Paul is responsible for setting the direction of the company. He founded both e-Tek and Forte Technologies Inc. and has been the driving force behind Vuzix' development of Video Eyewear products for the consumer market. With 20 years experience in the consumer electronics field and nine years experience in the Virtual Reality and Virtual Display fields, he is a nationally recognized industry expert. Paul was responsible for bringing the first application of wave table synthesis to the PC platform. Through his corporation, Forte Technologies, he defined the core for HID class specification for the ubiquitous USB standard found on all PCs today.

**Chief Financial Officer & Exec VP of Business Development: Grant Russell**

Grant has been a director and officer of numerous public companies in mining, oil & gas, technology and PC software over the last 25 years. He co-founded Advanced Gravis Computer Technologies in 1984. Under his leadership as President, Advanced Gravis grew to become the world's largest PC and Macintosh joystick manufacturer with worldwide sales of \$44 million and 220 employees. In 1996, a Fortune 100 Company acquired Advanced Gravis in a public tender offer.

**VP of Military and Industrial Sales: Stephen Glaser**

Steve is responsible for all strategic sales and marketing initiatives for Vuzix' military and industrial Video Eyewear applications. Steve brings over 15 years of technology sales and sales management experience to the team. His experience includes positions with Johnson & Johnson, Kodak and Paychex.

**VP of Quality: Paul Churnetski**

Paul oversees the Quality Assurance Programs for all engineering, product development and manufacturing at Vuzix. Bringing over 25 years of industrial experience to the company, Paul was employed with medical manufacturers Fisons Corp. and Pennwalt Corp where he held senior positions in the areas of technical operations, quality assurance and information technology. Paul is well versed in ISO 9000 standards, Total Quality Management (TQM), and Continuous Quality Improvement (CQI). He is a member of the American Society for Quality (ASQ) and is certified as a Quality Engineer.

---

**Director of Manufacturing: Peter Artz**

Peter is responsible for directing Vuzix' manufacturing and warehousing operations for both the internal production facility and external contract manufacturers.

**Director of Engineering: Vincent J. Ferrer**

Vincent is responsible for directing hardware and software product development activities at Vuzix. Prior to joining the team in September 2005, he held positions at Belkin Components and eTEK Labs. Vincent holds a Bachelor of Science in Engineering and has extensive experience in software and hardware design and project management.

**VP of Eyetonomy Medical Systems: Gary Van Camp**

Gary is responsible for developing advanced low vision and medical solutions around Video Eyewear. He has over 20 years of electronics engineering, manufacturing, and project management experience. Past positions include five years at Intel as a World Wide Training and Project Manager, and a VP of Engineering. He has extensive hardware design and development experience including being a co-inventor on numerous patents related to high density tape storage.
